SHARING LOCAL DEVICES FROM A MAC TO WINDOWS USING REMOTE DESKTOP CONNECTION (RDP)

After you download the RDP file from the Remote Access Dashboard go to your downloads folder.

Drag the RDP file into the open Microsoft Remote Desktop App.

You will have Multiple Tabs to change Display settings, Devices & Audio, And Folders.

PC name:	B3608-49426.pclab.uhcl.edu			
User account:	Ask when	required	0

On the remote machine you should now see that file location under "File Explorer"

Alternatively, you can share other local resources like printers, microphones, cameras and multiple monitors as shown below.
