

Lee Revere, Ph.D.

As an applied statistician and Associate Professor of Decision Sciences, Revere uses her training across several subfields such as healthcare, teaching, information technology and organizational improvement. Her research appears in the *Journal of Healthcare Finance*, *International Journal of Management*, *Journal of Business and Information Technology*, *Applied Financial Economics*, and numerous others.

She also brings practical experience to the classroom. As a practitioner she has shaped and directed multidisciplinary benchmarking projects, developed a strategic business plan for continued growth for an HMO, and compiled financial projections and pricing data for managed care contracts, including two exclusive HMO contracts.
