ANTHONY L. JENKINS, PH.D.
DEAN OF STUDENTS

April 7, 2008

Dear UHCL Community Members:

Over the past year, members of the University Life Committee, with significant input from students, faculty and staff, have worked diligently to implement a new smoking policy for the university. We were committed to designing a policy that would help create a comfortable environment whereby both smokers and nonsmokers could enjoy our beautiful campus.

In February 2008, the new smoking policy was approved by University Council. Under the guidelines of the new smoking policy the campus will be smoke-free except for specific designated smoking areas. In an effort to help all members of our community and guests become familiar with our new smoking policy the ULC is launching an educational campaign. The campaign will include maps highlighting designated smoking areas, new smoking signs, copies of the new smoking policy and other important information.

As we undergo this transition, I ask that we work collectively not only to comply with the new smoking policy, but to also respect one another and the hard work of our colleagues, classmates, co-workers and friends. Please note the new smoking policy will be effective Fall 2008.

Best regards,

Dr. Anthony L. Jenkins
Dean of Students/Chair, University Life Committee
