Description

The individual in this position will be recognized as a key Health and Safety resource by site leadership. They will lead key teams and processes for the Channelview site. The candidate will proactively take ownership of site Health/Safety processes and influence Health/Safety decisions. This person will be recognized as a valued team member by key stakeholders, work independently, develop expertise in select Health/Safety areas and provide guidance to those with less experience.

Regulatory and technical knowledge: Must possess a strong knowledge of OSHA regulations and key Health and Safety systems. Must be able to serve on site teams representing both Health and Safety. Candidate will be recognized as having technical expertise. Areas of knowledge include industrial hygiene, incident investigation, behavioral safety, process safety, loss prevention and worker's compensation.

Process knowledge: Has, or is capable of developing, a basic knowledge of the units and processes to which the regulations and requirements must be applied and is able to identify opportunities for improvement.

Organizational knowledge: Understands the organization and the roles and responsibilities of each function. Develops an understanding of the political relationships within the organization. Recognizes when and how to get things done outside the normal channels.

Business knowledge: Developing an understanding of current business drivers, understands their impact on existing health and/or safety programs, and is able to make necessary adjustments.

Interacts and works well with others: Has good communication, presentation, and interpersonal skills to help the HSE department, operations and other functional groups implement and maintain systems necessary to create a safe work environment. Able to communicate across multiple levels within the site and in different group settings. Builds positive relationships and is able to influence those within the immediate organization. Willing to ask for assistance from others. Occasionally serves as a team leader/facilitator to address specific issues and becomes increasingly valuable in this regard.

Applies experiences to develop and execute a long-range plan for the site's industrial hygiene and/or safety program: Supports and provides direction to the site's industrial hygiene and/or safety programs. Has confidence in their knowledge and decisions. Adapts to the situation at hand and is able to bring problem situations under control. Able to execute a long-range plan for all aspects of the sites occupational health and/or safety programs. Anticipates and prepares for a specific opportunity or problem that is not obvious to others. Develops specific scope and objective and determines necessary tasks and resources. Takes action to create an opportunity or avoid future crisis, looking ahead 1-6 months. Has a firm understanding of department and Company goals and strategies and changes priorities appropriately. Establishes measurements, monitors performance and progress. Does not give up easily when things do not go smoothly. Recognizes the validity of others' viewpoints and often solicits other views. Demonstrates pride in the work that's been completed. Able to effectively manage multiple tasks, but is also able to relinquish tasks that can be performed by support staff or less seasoned professionals.

Negotiations with Agencies and Auditors: Has the confidence, capability and willingness to maintain the site's position with an agency representative or auditor, as appropriate, on the interpretation and applicability of requirements.

Develops Professionally: Seeks out opportunities to broaden his/her technical expertise and leadership skills.
